BOBINETTE

Used to reduce light in measurable amounts, a single layer reduces transmitted light $\pm 1/2$ stop. Bobinette can be doubled and even tripled for further transmission reduction. Keep in mind, that if the fabric is run the same way you get a moire pattern. When doubling the fabric, you need to rotate the second layer 90° to avoid this phenomenon, limiting the maximum size of a seamless piece to 24' x 24'. However, moire patterns cannot be avoided when tripling. Bobinette is available black or white in 6' (1.82m), 12' (3.65m) and 24' (7.31m) widths as a raw fabric, or made to order finished rag in any size for sale, or for rental from a huge variety of stock and custom sizes.

SINGLE LAYER DOUBLE NET

The maximum size of 24' X 24' double net is now a thing of the past. With this new, revolutionary fabric, you can now create up to a 20' X 60' seamless single-layer double net. Available in black only in 20' (6.1m) as a raw fabric, or for sales or rental in stock sizes.
